

MERLONI PROGETTI

Established in 1973, Merloni Progetti is a leading Italian EPC contractor with a track record of more than 100 industrial plants carried out in 26 countries worldwide.

The Company is specialized in the design, supply, installation and start-up, including personnel training, of industrial plants, built on the basis of proprietary patents or exclusive licenses, providing its Clients with innovative solutions in the fields of bioenergy and electromechanical engineering:

- Power plants generating energy from liquid and solid biomass
- Customized solutions for solar parks
- Multi-feedstock biodiesel and bioethanol production plants
- Vegetable proteins production plants
- Treatment and recovery plants for scrap batteries
- Household and thermo-sanitary appliances production plants
- Electric power plants from traditional sources
- Planning and erection of industrial, office, and logistics centers

Moreover, the Company supports its Clients during the fund raising process both on the equity and bank borrowing side.

Headquartered in Milan, Italy, Merloni Progetti has set up its international branches in China, Russia and has its representative offices in different countries all over Europe.
